3. MANAGEMENT DISCUSSION AND ANALYSIS REPORT

The Company provides seating solutions for transport applications and has established a leading position in the country catering to all segments of the automotive industry.

INDUSTRY STRUCTURE AND DEVELOPMENTS

The global financial crisis, that began in the second half of 2008-09, had adversely affected the Company's turnover during the second half of that year. The current fiscal year 2009-10 also started with continuing adverse effects on the Company's business. However, during the year, the Indian economy posted a remarkable recovery, not only in terms of overall growth figures but, more importantly, in terms of certain fundamentals.

Due to growth in manufacturing sector, industry grew by 8.2% as compared to 3.9% in 2008-09. The growth of service sector was estimated at 8.7% in 2009-10 as compared to 9.8% growth in 2008-09. The rainfall during 2009-10 was 23% below normal of Long Period Average (LPA) and agricultural production declined by 0.2% as compared to 2008-09. The continued recession in the developed world, for the better part of 2009-10, meant a sluggish recovery in export markets.

The domestic automotive demand has sharply recovered during the year, supported by fiscal incentives offered by Government of India and a revival in the underlying economy. All the segments of the Indian automotive industry registered a positive growth during 2009-10. The following table highlights the industry sales figures in vehicle units.

Category	2009-10 nos.	2008-09 nos.	Growth %
Medium and Heavy Commercial vehicles (MHCV)	240,138	200,406	19.8%
Light Commercial vehicles (LCV)	291,677	226,389	28.8%
Buses	47,676	42,441	12.3%
Cars & MUVs	2,268,551	1,887,619	20.2%
Tractors	364,399	329,940	10.4%
Three wheelers	604,848	497,793	21.5%
Two wheelers	10,253,337	8,441,844	21.5%

(Source: SIAM)

The Company's recovery in all segments of the domestic automotive industry resulted in overall sales growing by 13.92% in 2009-10. Due to weak demand in export markets, the export sales stood at Rs.11.2 Cr. In terms of the Joint Venture arrangement between the Company and M/s. F.S. Fehrer Automotive GmbH, Germany, effective 22nd January 2010, the two wheeler seats, Long Fibre Injection (LFI) & Micro Cellular Urethane (MCU) products and the foaming businesses of the Company have been transferred to Harita Fehrer Limited (HFRL), as approved by the shareholders. Against this background, the Company has registered a sale of Rs.224.9 Cr in 2009-10 (Rs.197 Cr in 2008-09) and a loss of Rs. 1.00 Cr in 2009-10 (loss of Rs.7.9 Cr in 2008-09).

OPPORTUNITIES AND THREATS

With the revival of economy and the roll out of commercial vehicles by multinational companies, the Company expects the commercial vehicle market to grow in terms of high value high-end sophisticated vehicles with international standards to be launched in Indian market in the near future. Being an established leader in this segment, the Company has secured orders from Daimler India and Ashok Leyland Nissan also. Efforts have already been made to develop high-end seats for these applications.

Having established a leadership position in tractor seat segment in the domestic market, the Company has now been focusing on export market and committed to meet customer requirements in terms of quality, cost, delivery and service.

The Company has been benefited by the introduction of Volvo buses. The Company will be able to supply seats to Mercedes Benz buses, and these seats are expected to create better comfort for the passengers in these high end buses. This move has brought a new outlook among other leading bus manufacturers, who also started

building high-end buses. This has provided the Company with greater opportunities in the high-end bus segment.

The Government is expected to continue its focus on strengthening of infrastructure in the country. As a result, it is expected that the demand for earth moving equipment would increase. The Company has already developed suitable seats for this application and expects greater opportunities for business in this segment.

A few multi-national seat manufacturing companies in the segment of bus passenger and commercial vehicle seats have established manufacturing facilities in India with the help of local partners. This is a perceived threat.

Innovation is the key to success and the Company is fully committed to focus on product innovation by developing newer cost effective products precisely targeted at customer needs in order to meet the threats posed by competition and to leverage the opportunities offered by the market. The Company's well established products and in-house design capabilities in alignment with customers' needs will enable the Company to retain and improve its market share through well defined strategies.

PRODUCT-WISE PERFORMANCE

The positive recovery in all segments of the domestic automotive industry resulted in the overall sales growing by 13.92% in 2009-10. The growth in the commercial vehicle segment resulted in a growth of 25% in MHCV. Two wheeler seats grew by 23%, bus passenger seats by 12% and tractor seats by 10%.

During the last year 2008-09, the Company acquired the foaming business of Polyflex Group of companies. Through this acquisition, the Company and its subsidiary now have entry as Tier-2 polyurethane foam supplier to reputed

customers like Hanil Lear, Tata Johnson Controls, Lear and Toyota Boshoku. The foam pads supply by HFRL will go into the cars of Hyundai, Tata Motors, Ford, Mahindra & Mahindra and Toyota Kirloskar.

BUSINESS OUTLOOK AND OVERVIEW

In 2010-11, the GDP is projected to grow by 7.5 ~ 8 %. This outlook of the economy is expected to continue the growth in domestic automotive sector. While the passenger car industry is likely to register a growth of 15%, supported by a large number of launch of small cars and export of the same, the two-wheeler segment is expected to register 10% growth. The MHCV & LCV segments are expected to grow at 15% and 20% respectively. Tractors and three wheelers segments, both are estimated for a growth of 10% for 2010-11. As regards exports, the US market is expected to grow by 2%. In view of the factors mentioned above, the Company expects to have a healthy growth in the domestic market in the year 2010-11.

Having already established a leading position in tractor seats in domestic market, the Company is focusing on export markets, specifically new models for a leading Original Equipment (OE) manufacturer in the United States. Higher volume of business from this opportunity is expected in the coming years.

RISKS AND CONCERNS

The rising demand of all commodities is expected to increase the price of steel, chemicals, plastics and rubber and may create margin pressures during the current year. The Company has initiated price increase discussions with all customers and timely settlement will determine the Company performance.

The stringent quality demand of overseas customers may result in occasional possibilities of rework overseas at a high cost. Every step will be taken by the Company to avoid such situations. Risks due to fluctuations in foreign exchange are mitigated by taking forex cover, where necessary.

The fiscal year 2009-10 began as a difficult one, following the financial crisis that began globally in 2008 and spread to the real economies across the world. Indian economy posted a remarkable recovery, not only in terms of overall growth figures but, more importantly, in terms of certain fundamentals, which justify optimism for India in the medium to long term. The economy is estimated to grow at 7.2% during 2009-10 higher than the initial estimate of 5%. The improved performance can be attributed to manufacturing sector's performance during 3rd and 4th quarters of FY10. Industrial growth is estimated at 8.2% in 2009-10 as against 3.9% in 2008-09.

In 2009-10, volumes of domestic passenger car & utility vehicles (UV) sales recovered sharply with a growth of 26%. Reduction in excise duty & fuel prices, lowered the cost of ownership for consumers in 2009-10. Also reduced uncertainty over growth in income levels & better financing environment improved consumer sentiments.

The Company achieved a sale of Rs 92.8 Cr, and registered a loss of Rs 7.4 Cr during 2009-10.

4. BUSINESS OUTLOOK & OVERVIEW

The Indian economy is expected to grow at 7.5 - 8 percent in 2010-11. The domestic passenger car & utility vehicle industry is expected to continue its growth momentum in 2010-11, with growth in sales volumes estimated at 13-15 percent. Rise in disposable income due to tax savings offered in Union budget 2010-11, improvement in business and customer confidence are the two growth drivers for the industry. The two wheeler industry is expected to grow at 17-18 percent.

Specifically, the Company's business with passenger car and utility vehicle customers is expected to grow by 62%, and the business with two wheeler seats is expected to grow by 54%. The new technology products like long fibre injection moulded components & micro cellular urethane products for automotive applications are expected to achieve sales of more than Rs.11 Cr in 2010-11. The Company has also obtained order from Lear Automotive for foam supplies to M&M utility vehicles at Pune.

The Company also has plans to tap the export market for head-rests and arm-rests through the parent Company, Fehrer. The Company has identified various cost reduction projects for implementation during the year to make it competitive in the marketplace. It also has plans to set up a polyol blending unit to significantly reduce the material cost for foam production. With the pricing of the foam the single biggest factor in obtaining foam businesses from customers in India, this move will not only help to improve profitability but also gain additional business in future from customers.

The Company expects to achieve substantial increase in turnover and also begin to realize profits from the current year.
