6.4 Evaluation Criteria:

The NRC laid down the criteria for evaluating the performance of every Director, Committees of the Board and the Board as a whole and also the performance of KMP and SMP.

The performance evaluation of the Board as a whole was assessed based on the criteria, like its composition, size, mix of skills and experience, its meeting sequence, effectiveness of discussion, decision making, follow up action, quality of information, governance issues and the performance and reporting by various committees set up by the Board.

As per the Companies Amendment Act, 2017, evaluation of all Directors by both

the Board and NRC was avoided. Pursuant to this amendment, the following changes were incorporated in NRC Policy to avoid duplication of evaluation process.

“NRC should ‘prescribe a methodology to carry out evaluation of performance of individual Directors, Committee(s) of the Board, Chairman and the Board as a whole’, and the Board should carry out the performance evaluation as per the methodology either by itself, by NRC or by an external agency.

The performance evaluation of individual Director was carried out based on his / her commitment to the role and fiduciary responsibilities as a Board Member, attendance and active participation, strategic and lateral thinking, contribution and recommendations given professionally, heading / acting as Member of various committees etc.

The performance of SMP was measured against their achievement of the business plans approved by the Board during and at the completion of the financial year and their annual ‘at-risk’ remuneration which reflects their business plan achievements. An evaluation of performance has been undertaken based on the criteria for all the SMP for 2017-18 and this has been in accordance with the above process.

The NRC has the overall responsibility for evaluating and approving the compensation plans, policies and programmes applicable to SMP. The NRC also delegated its authority to the Chairman, wherever appropriate, for this purpose.

We have audited the internal financial controls over financial reporting of **Harita Seating Systems Limited** ("the Company"), Jayalakshmi Estates, #29, Haddows Road, Chennai – 600006, as of 31st March 2018 in conjunction with our audit of the standalone Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable Ind AS financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls,

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the standalone Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of standalone Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A company's

internal financial control over financial reporting includes those policies and procedures that;

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at **31st March 2018**, based on;

1 SIGNIFICANT ACCOUNTING POLICIES

HARITA SEATING SYSTEMS LIMITED ('the Company') is a Public Limited Company incorporated in India. The company's equity shares are listed on NSE. The registered office is located at "Jayalakshmi Estates", 29, Haddows Road, Nungambakkam, Chennai – 600006, Tamil Nadu, India.

1.1 Statement of compliance

The financial statements have been prepared as a going concern in accordance with Indian Accounting Standards (Ind AS) notified under the Section 133 of the Companies Act, 2013 ("the Act") read with the Companies (Indian Accounting Standards) Rules, 2015 and other relevant provisions of the Act.

Upto the year ended 31st March, 2017, the Company prepared financial statements in accordance with the requirements of previous GAAP, which includes standards notified under the Companies (Accounting Standards) Rules, 2006 and other relevant provisions of the Act.

These are Company's first Ind AS based financial statements. The date of transition to Ind AS is 1st April, 2016. Company has opted certain exemptions while first-time adoption of Ind As based Financial statement (refer note 39 of Financial Statement)

1.2 Basis of preparation and presentation

The financial statements have been prepared on the historical cost convention on accrual basis except for certain financial instruments which are measured at fair value at the end of each reporting period, as explained in the accounting policies mentioned below. Historical cost is generally based on the fair value of the consideration given in exchange of goods or services.

The principal accounting policies are set out below:

All assets and liabilities have been classified as current or noncurrent according to the Company's operating cycle and other criteria set out in the Act. Based on the nature of products and the time between acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as twelve months for the purpose of current and non-current classification of assets and liabilities.

1.3 Going concern

The board of directors have considered the financial position of the Company at 31st March 2018 and projected cash flows and financial performance of the Company for at least twelve months from the date of approval of these financial statements as well as planned cost and cash improvement actions, and believe that the plan for sustained profitability remains on course.

The board of directors have taken actions to ensure that appropriate long-term cash resources are in place at the date of signing the accounts to fund the Company's operations.

1.4 Use of estimates and judgments

The preparation of financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amount of assets, liabilities, income, expenses and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amount of revenues and expenses for the years presented. Actual results may differ from the estimates.

1 SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimates are revised and future periods affected.

1.5 Revenue recognition

The Company recognizes revenue when the amount of revenue and its related cost can be reliably measured and it is probable that future economic benefits will flow to the entity and specific criteria in relation to significant risk.

1.5.1. Sale of goods

Revenue from sale of products is recognised when the products are delivered to the dealer / customer or when delivered to the carrier, when risks and rewards of ownership pass to the dealer / customer, as per terms of contract.

Revenue is measured at the fair value of the consideration received or receivable and net of returns, trade allowances and rebates. It includes excise duty but excludes Value Added Tax and Sales Tax.

1.5.2. Income from service

Income from services is accounted over the period of rendering of services.

1.6 Foreign currencies

1.6.1. Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the company operates ('the functional currency'). The financial statements are presented in Indian rupee, which is the company's functional and presentation currency.

1.6.2. Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognized in profit or loss.

1.7 Employee Benefits

1.7.1. Short term obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services upto the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

1.7.2. Other long term employee benefit

The liabilities for earned leave are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. They are therefore

1 SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

measured as the present value of the expected future payments to be made in respect of services provided by employee upto the end of reporting period using the projected unit credit method. The benefits are discounted using the market yields at the end of the reporting period that have terms approximating to the terms of the related obligation. Measurements as a result of experience adjustments and changes in actuarial assumptions are recognized in profit or loss.

The obligations are presented as current liabilities in the balance sheet if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting period, regardless of when the actual settlement is expected to occur.

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats accumulated leave expected to be carried forward beyond 12 months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the period-end. Actuarial gains/losses are immediately taken to the statement of profit and loss and are not deferred. The Company presents the leave as a current liability in the balance sheet; to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where Company has the unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

1.7.3. Post-employment obligation

The Company operates the following post-employment schemes:

- a) Defined benefit plans such as gratuity for its eligible employees, and
- b) Defined contribution plans such as provident fund.

Defined contribution plan:

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognizes contribution payable to the provident fund scheme and pension scheme as expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

Defined benefit plan:

The Company has a gratuity defined benefit plans for its employees. The costs of providing benefits under these plans are determined on the basis of actuarial valuation at each year-end. Separate

1 SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

actuarial valuation is carried out for each plan using the projected unit credit method. Re-measurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and the balance sheet. The Company has funded this with Life Insurance Corporation of India ('LIC'). The contributions made to the LIC are treated as plan assets. The defined benefit obligation recognised in the balance sheet represents the present value of the defined benefit obligation as reduced by the fair value of plan assets.

1.7.4. Bonus plans

The Company recognizes a liability and an expense for bonus. The Company recognizes a provision where contractually obliged or where there is a past practice that has created a constructive obligation

1.8 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

1.8.1. Current tax

The income tax expenses or credit is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted.

1.8.2. Deferred tax

Deferred tax is provided in full, using the balance sheet approach, on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profits. Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognised for all deductible temporary differences and incurred tax losses to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

1 SIGNIFICANT ACCOUNTING POLICIES (Continued)

1.8.3. Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the income taxes are also recognised in other comprehensive income or directly in equity respectively.

1.8.4. MAT Credit

Outstanding MAT Credit as at 31st March 2018 has been considered in this financial year as the certainty for utilisation has been ascertained and partially utilised in the current financial year

1.9 Property, plant and equipment

Property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation less accumulated impairment, if any.

Such assets are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. The other repairs and maintenance of revenue nature are charged to profit or loss during the reporting period in which they are incurred.

Transition to Ind AS

On transition to Ind AS, the Company has elected to continue with the carrying value of its property, plant and equipment recognised as at 1st April 2015, measured as per the previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment.

Depreciation methods, estimated useful lives and residual value

Depreciation is calculated using the straight-line method on a prorata basis from the month in which each asset is put to use to allocate their cost, net of their residual values, over their estimated useful lives.

Estimated useful life of assets are as follows which is based on technical evaluation of the useful lives of the assets:

Particulars	Useful life in years (Nos.)
Buildings	30
Plant & Machinery	14
Vehicles	8
Computer hardware	3

The assets' residual values, estimated useful lives and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Gains and losses on disposal are determined by comparing proceeds with carrying amount and are credited / debited to profit or loss.

1 SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

2.0 Intangible assets

Intangible assets are stated at cost of acquisition or construction less accumulated depreciation less accumulated impairment, if any.

2.0.1. Deemed cost on transition to Ind AS

For transition to Ind AS, the Company has elected to continue with the carrying value of all of its intangible assets recognised as of 1st April, 2015 (transition date) measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

2.1. Impairment of tangible and intangible assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any).

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

2.2. Inventories

Inventories are valued at the lower of cost and net realizable value.

The cost of finished goods and work in progress comprises raw materials, direct labor, other direct costs and appropriate proportion of variable and fixed overhead expenditure. Overhead expenditures are being allocated on the basis of normal operating capacity. Raw materials are valued at weighted average cost. Cost of inventories also include all other costs incurred in bringing the inventories to their present location and condition. Costs of purchased inventory are determined after deducting rebates and discounts. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

Non- production inventory (other than those supplied along with main plant and machinery, which are capitalised and depreciated accordingly) are charged to profit or loss on consumption.

2.3 Provisions and contingencies

Provisions: Provisions are recognised when there is a present obligation or constructive obligation as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are determined by discounting the expected future cash flows at a pre tax rate that reflects current market assessment of the time value of money and the risks specific to the liability

Contingent Liabilities: Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

1 SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

2.4 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial instruments (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss. Subsequently, financial instruments are measured according to the category in which they are classified.

2.5 Financial assets

All purchases or sales of financial assets are recognized and de-recognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognized financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

2.5.1. Classification of financial assets

Classification of financial assets depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those measured at amortised cost

The classification depends on the Company's business model for managing the financial assets and the contractual terms of the cash flows.

A financial asset that meets the following two conditions is measured at amortised cost unless the asset is designated at fair value through profit or loss under the fair value option:

- Business model test : the objective of the Company's business model is to hold the financial asset to collect the contractual cash flows.
- Cash flow characteristic test : the contractual term of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset that meets the following two conditions is measured at fair value through other comprehensive income unless the asset is designated at fair value through profit or loss under the fair value option:

- business model test : the financial asset is held within a business model whose objective is achieved by both collecting cash flows and selling financial assets.

1 SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

- cash flow characteristic test : the contractual term of the financial asset gives rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are measured at fair value through profit or loss.

2.5.2. Financial assets at fair value through profit or loss (FVTPL)

Investment in equity instrument are classified at fair value through profit or loss, unless the Company irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investments in equity instruments which are not held for trading.

Financial assets that do not meet the amortised cost criteria or fair value through other comprehensive income criteria are measured at fair value through profit or loss. A financial asset that meets the amortised cost criteria or fair value through other comprehensive income criteria may be designated as at fair value through profit or loss upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets and liabilities or recognising the gains or losses on them on different bases.

Investments in debt based mutual funds are measured at fair value through profit and loss.

Financial assets which are fair valued through profit or loss are measured at fair value at the end of each reporting period, with any gains or losses arising on re measurement recognized in profit or loss.

2.5.3. Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost less provision for impairment.

2.5.4. Cash and cash equivalents

In the cash flow statement, cash and cash equivalents includes cash in hand, cheques and drafts in hand, balances with bank and deposits held at call with financial institutions, short-term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet and forms part of financing activities in the cash flow statement. Book overdraft are shown within other financial liabilities in the balance sheet and forms part of operating activities in the cash flow statement.

2.5.5. Impairment of financial assets

The Company assesses impairment based on expected credit losses (ECL) model to the following:

- financial assets measured at amortised cost
- financial assets measured at fair value through other comprehensive income

Expected credit loss are measured through a loss allowance at an amount equal to :

- the twelve month expected credit losses (expected credit losses that result from those default events on the financial instruments that are possible within twelve months after the reporting date); or

1 SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

- full life time expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 18, the Company always measures the loss allowance at an amount equal to lifetime expected credit losses.

2.5.6. Income recognition

Interest Income: Interest income from debt instruments is recognised using the effective interest rate method.

2.6 Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest rate method or at fair value through profit or loss.

2.6.1. Trade and other payables

Trade and other payables represent liabilities for goods or services provided to the Company prior to the end of financial year which are unpaid.

2.6.2. Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest rate method.

Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

2.6.3. Foreign exchange gains or losses

For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortised cost of the instruments and are recognised in profit or loss.

The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the exchange rate at the end of the reporting period. For financial liabilities that are measured as at fair value through profit or loss, the foreign exchange component forms part of the fair value gains or losses and is recognised in profit or loss.

2.7. Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

1 SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

2.8. Leases

Leases of property, plant and equipment where the Company, as a lessee has substantially all the risks and rewards of ownership, are classified as finance leases. Finance leases are capitalised at the lease's inception at the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding rental obligations, net of finance charges, are included in borrowings or other financial liabilities as appropriate. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to the profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Leases in which a significant portion of the risks and rewards of ownership are not transferred to the Company as lessee are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to profit or loss on a straight-line basis over the period of the lease unless the payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

2.9. Borrowing costs

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

Other borrowing costs are expensed in the period in which they are incurred.

3.0. Government grants

Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Company will comply with all attached conditions.

Government grants relating to income are deferred and recognised in the profit or loss over the period necessary to match them with the costs that they are intended to compensate and presented within other income.

Government grants relating to the purchase of property, plant and equipment are included in non-current liabilities as deferred income and are credited to profit or loss on a straight-line basis over the expected lives of the related assets and presented within other income.

3.1. Earnings Per Share

Basic earnings per share have been computed by dividing the net income by the weighted average number of shares outstanding during the year. Diluted earnings per share has been computed using the weighted average number of shares and diluted potential shares, except where the result would be anti-dilutive

3.2. Dividends

Final dividends on shares are recorded on the date of approval by the shareholders of the Company.

31 FAIR VALUE MEASUREMENTS (Continued)

Fair value hierarchy

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are (a) recognised and measured at fair value and (b) measured at amortised cost and for which fair values are disclosed in the financial statements.

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments, traded bonds and mutual funds that have quoted price. The fair value of all equity instruments (including bonds) which are traded in the stock exchanges is valued using the closing price as at the reporting period. The mutual funds are valued using the closing NAV.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, traded bonds, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities, contingent consideration and indemnification asset included in level 3.

There are no transfers between levels 1 and 2 during the year.

The company's policy is to recognise transfers into and transfers out of fair value hierarchy levels as at the end of the reporting period.

The carrying amounts of trade receivables, trade payables, loans, deposits, advances, borrowings, cash and cash equivalents and other current financial liabilities are considered to be the same as their fair values, due to their short-term nature.

32 FINANCIAL RISK MANAGEMENT

The company's activities expose it to market risk, liquidity risk and credit risk.

(A) Credit risk

As at the balance sheet date, based on the credit assessment the historical trend of low default is expected to continue. An impairment analysis is performed at each reporting date on an individual basis for major clients. Any recoverability of receivables is provided for based on the impairment assessment. Annexure 'A' to the Independent Auditors' Report on the Consolidated Ind AS Financial Statements for the year ended 31st March 2018

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

In conjunction with our audit of the consolidated Ind AS financial statements of the Company as of and for the year ended 31st March 2018, we have audited the internal financial controls over financial reporting of Harita Seating Systems Limited ("the Holding Company"), Jayalakshmi Estates, #29, Haddows Road, Chennai – 600006, and its subsidiary company incorporated in India, as of that date.

Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the Parent and its subsidiary company, incorporated in India are responsible for establishing and maintaining internal financial controls based on Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These

responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable Ind AS financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Holding Company and its subsidiary company, incorporated in India based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation

of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that;

- (1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and
- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Holding Company and its subsidiary company, incorporated in India have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March 2018, based on;

- i. existing policies and procedures adopted by the Holding Company and its subsidiary company for ensuring orderly and efficient conduct of business;
- ii. continuous adherence to the respective Company's policies;
- iii. existing procedures in relation to safeguarding of the respective Company's fixed assets, investments, inventories, receivables,

loans and advances made and cash and bank balances;

- iv. existing system to prevent and detect fraud and errors;
- v. accuracy and completeness of the Company's accounting records; and
- vi. existing capacity to prepare timely and reliable financial information

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments, traded bonds and mutual funds that have quoted price. The fair value of all equity instruments (including bonds) which are traded in the stock exchanges is valued using the closing price as at the reporting period. The mutual funds are valued using the closing NAV.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, traded bonds, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities, contingent consideration and indemnification asset included in level 3.

There are no transfers between levels 1 and 2 during the year.

The company's policy is to recognise transfers into and transfers out of fair value hierarchy levels as at the end of the reporting period.

The carrying amounts of trade receivables, trade payables, loans, deposits, advances, borrowings, cash and cash equivalents and other current financial liabilities are considered to be the same as their fair values, due to their short-term nature.
